CYBERDUDE NETWORKS PVT .LTD . CHENNAI

Department Of Information Technology organizesseminar onbuilding application from scratch using frontend technologiesThe Hands-on-training was attended by third and final year students..The aim of the session is to teach about web development.

OUTCOMES:

- Brief explanation was given about frontend and backend technologies. He explained about software and hardware related projects .
- We had hands on training on HTML,CSS, JAVASCRIPT from basics to advance.
- He sharedhis you tube channel link for us for learning new technologies.
- He explained brief about frontend technologies such as css frameworks.
- He explained about Node JS , React

- He demonstrated fuel cost calculating web application and told how to develop that web application .
- The key speaker also shared his ideas for developing a final year project. Finally the session was very much useful to us.

We are immensely grateful to our Principal and our Head of the Department for arranging this Hands-on-training and also we are thankful to the resource person who spend his valuable time with us by teaching in an interactive way.
