Chennai.

Department Of Information Technology organizes seminar on "Application of Artificial Intelligence". The seminar was attended by final year students and faculty members of IT .The aim of the session is to teach about application of artificial intelligence.

OUTCOMES :

- The speaker shared his interview experience to us .
- The speaker told how to perform interviews.
- And then the speaker shared his life journey in it industry and how to move to high position in it industry.
- The speaker told about how to do projects and gave some tips to choose a right projects.
- The Speaker shared his final year Project .
- The speaker shared his college life story how they enjoyed the college life .
- The key speaker gave some interviews tips to crack the job .
- Finally Today session was too useful for us .
- Its really a motivational session for one who feels bad about themselves

The session was most interesting and interacting and got a good feedback from the students.

At the end of the session the speakers answered all our queries.

We are immensely grateful to our principal and our Head of the Department for giving us this opportunity and also we are thankful to the resource person who spend his valuable time with us by teaching in an interactive way.
